LIGHT HANDLE COVERS AND CAMERA COVERS		Page 1 of 4

Product Family	Light Handle Covers and Camera Covers
Intended Use	Light Handles: are intended to provide a sterile interface between the operating room surgical lamps (non-sterile) and the Surgeon or Nurse (sterile). Camera Covers: intended to provide a sterile interface between the non- sterile surgical camera and the Surgeon
Description	Light Handle Covers: are sterile, single-use devices intended to act as a sterile surface between the non-sterile surgical light and the Surgeon or healthcare professionals during procedures. The devices are available in two main configurations: Rigid Light Handle Cover and Flexible Light Handle Cover
	Camera Covers: single use universal rigid cover for O.R. cameras, in this case typically attached to an O.R. light. The cover has a transparent material assembled into the distal end to provide a sterile interface while maintaining proper camera visibility

LIGHT HANDLE COVERS AND CAMERA COVERS		Page 4 of 4

REACH Regulation 1907/2006	Aspen confirms that to the best of our knowledge that none of these
	products or product packaging contain any Substances of Very High
	Concern (SVHC) as noted on the REACH Candidate List in a concentration
	above 0.1% by weight allowable limit. This list will continue to be
	monitored for additions or modifications
California Proposition 65	At this time, this product does not contain chemicals listed on California's
	Safe Drinking Water & Toxic Enforcement Act, commonly known as
	California Proposition 65. This list will continue to be monitored for
	additions
Biological/Biocompatibility Report	When used as intended, the Light Handle Covers and Camera Covers are
	touched by the practitioner with a gloved hand. There is no intended
	patient or practitioner contact; therefore, biocompatibility testing is not
	required according to ISO 10993-1
	Conclusion: Device poses no biological risk
